

WaPOR Concepts and Validation

An OpenCourseWare from IHE Delft and FAO

MODULE 1

Remote sensing ET concepts
(3 units)

MODULE 2

WaPOR methodology
(5 units)

MODULE 3

WaPOR validation
(5 units)

IHE Delft Institute for Water Education and FAO have developed a new OpenCourseWare in the framework of the second phase of the FAO WaPOR project. This course aims to provide a better understanding of the theoretical concepts used to generate remote sensing based data on evapotranspiration and biomass production including their limitations. Specific attention will be given to the WaPOR database and how a systematic validation of the data can be done.

The course is free to attend and is open to all who are interested. A reliable internet connection is required. The course is self-paced. A certificate of completion can be obtained after completing all assignments. More information at www.un-ihe.org/open-courseware

How to enroll:

Sign up for an account at ocw.un-ihe.org, then follow the course link to enroll. Enrollment starts June 1, 2023 (13:00 CET). Course will be open on 15 June.
